

Carlos Ramirez

Springville, UT • (801) 921-9616 • cgr-20.github.io/portfolio

Professional Summary

Motivated back-end developer with a solid foundation in programming languages including C, Python, Java, and SQL. Skilled in building logical, data-focused solutions and learning new technologies quickly. Passionate about writing clean efficient code and developing complex systems.

Education and Projects

Bachelor of Science in Computer Science, December 2024

Utah Valley University – Orem, UT

Compiler Project

Designed and implemented a custom compiler for KXI, a simplified Java-like language. Used ANTLR for parsing and AST generation. Implemented lexical analysis, semantic checking, and code generation written in Java. The processor and assembler used to execute KXI was written in C and Python respectively.

Various Design Pattern Projects

Multiple projects written in Java that each demonstrate different design patterns, such as strategy, observer, decorator, factory, singleton, visitor, state, and much more.

SQL Database Project

Designed and implemented a relational database with optimized SQL queries and CRUD operations to manage data efficiently.

Skills

Object-oriented programming.

Git and GitHub proficiency.

SQL database and queries.

Testing and debugging.

Software development.

Problem-solving.

Programming proficiency in C, C++, C#, Java, Python, SQL.

Work History

Document Processing and Data Entry Clerk (Seasonal), April 2026 – May 2026

Utah State Tax Commission – Salt Lake City, UT

Worked extensively with data-focused systems and workflows to process, verify, and maintain accurate physical and digital records.

Used analytical thinking and attention to detail to ensure data integrity and efficient information processing.

Shipping Assistant, June 2019 – August 2019

Young Living Essential Oils – Springville, UT

Applied strong attention to detail in packaging and logistics to ensure accuracy in order fulfillment.

Adapted to structured workflows and followed detailed instructions to maintain efficiency.

STEM Ambassador, August 2016 – May 2017

Introduced middle school students to foundational programming in C#, encouraging logical thinking and problem-solving.

Collaborated with peers to deliver structured lessons that reinforced coding fundamentals.
